

Hands On Science

We here at Compass Rose Academy are so excited about our new Hands On Science program for children ages 3 through 3rd grade! This program will provide a unique and interactive science experience for children that are as entertaining as they are educational. Each class will explore a new science topic each week; topics will range from plate tectonics, to animal life cycles, to outer space! We can't think of a more fun way to spend a chilly February afternoon, can you?
